

Exhibition

Layout of the booth

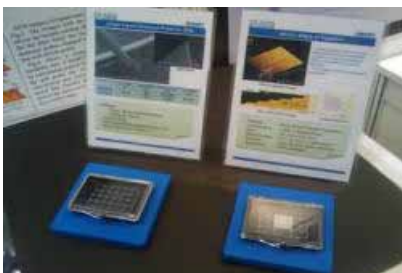

A total of 527 exhibitors were on show at the Globaltronics covering 12,000sqm. The show attracted 10,000 visitors.

Namiki booth received good visibility to visitors due to its location and design of the booth.

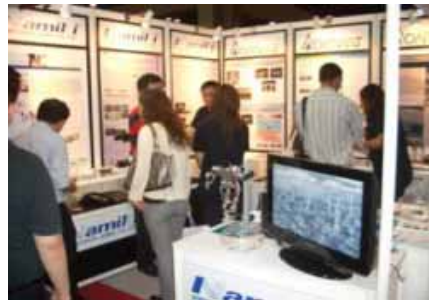

Products Showcase

Adamant (as a group of Namiki) displayed its optical components such as ferrules/connectors/ lensed fibre / Isolators which are indispensable for optical telecommunication industry and also showcased semiconductor related products such as ruby & ceramic capillary for wire bonding machine.

Namiki displayed its capability of nano-technology such as single crystal diamond probe with tip radius less than 15 nm for STM probe and atomic step sapphire wafer (step height: 0.22nm) for height calibration of STM.

Step Wafers and Diamond Probes

Visitors to the booth

Adamant products

For mobile communication, vibration speaker was displayed for mobile phones industry and tactile functions for touch screen.

Vibration Speaker

New Product

General motor R&D revealed its prototype of a 1.5mm brushless motor for the micro industry and it received good response in the exhibition.

Showcasing 1.5mm brushless motor

Appreciation

It was an excellent opportunity for us to expand Namiki sales to the South Asia market and there were positive impressions for visitors to take back as they recognised that the Namiki Group have diversified and first in the world products for the electronics industry.
